

METHODS OF TREATING NEURODEGENERATIVE
INFLAMMATION WITH CHIMERIC ANTI-TNF ANTIBODIES

ABSTRACT

Anti-TNF antibodies, fragments and regions thereof which are specific for human
5 tumor necrosis factor- α (TNF α) and are useful *in vivo* diagnosis and therapy of a number
of TNF α -mediated pathologies and conditions, as well as polynucleotides coding for
murine and chimeric antibodies, methods of producing the antibody, methods of use of
the anti-TNF antibody, or fragment, region or derivative thereof, in immunoassays and
immunotherapeutic approaches are provided.
